

## System of Systems Engineering

26 – 28 July 2010

Holiday Inn Orchard, Singapore

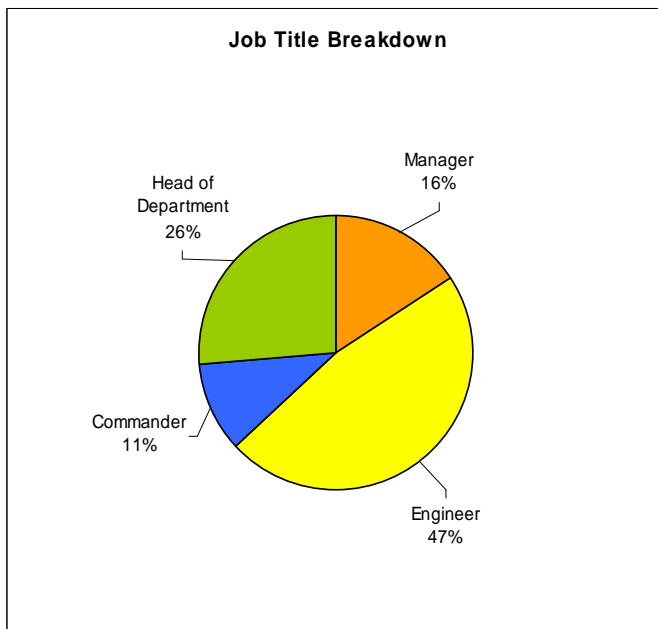

[www.militarysose.com](http://www.militarysose.com)

### POST EVENT NEWS

The course was designed to provide solutions to the challenges that militaries faced in SoSE. It helped participants in:

- Framing the issues surrounding SoSe and discussing possible solutions to the challenges
- Understanding stakeholders' requirements and the needed Measures of Effectiveness
- Managing risk of possible failure in SoSE
- Evaluating possible approach to systems architecting frameworks to ensure flexibility in meeting changing warfighters' requirements.
- Managing integration issues of various systems in a military net-centric environment
- Review ways to map the relationships of the different systems in SoSE framework

### PARTICIPANTS
